DETAILED ACTION

Election/Restrictions

1. Applicant's election of group I (claims 1-11) in the reply filed on April 25, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 12-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 25, 2005.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on September 12, 2004 is considered by the examiner.

Drawings

4. The drawings were received on February 12, 2004. These drawings are approved.
5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference numbers "50" and "30" (Fig. 1); reference numbers "62", "68", "21" and "70" (Figs. 3 and 4); reference numbers "148" and "156" (Fig. 6); reference numbers "128", "130", "180", "182" and "184" (Fig. 7). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the

Art Unit: 2829

figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "24"; "28"; "52"; "516" have been used to designate both "optional communications boards" and "optional relay board"; "power supply" and "switcher"; "unregulated voltage V_{UR} " and "voltage divider"; " $V_{UR} > V_{TH1}$ " and "POWER DOWN", respectively. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

7. The drawings are objected to because Fig. 2 is not fully described in the detail description of the drawings, and " V_{TH1} " in step 520 of Fig. 5 should be -- V_{TH2} --. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to

the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

8. The disclosure is objected to because of the following informalities:

a/ on page 12, line 14, "18" should be -- 24 --.

b/ on page 24, line 18, "36" should be -- 136 --.

Appropriate correction is required.

9. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

10. Claim 1 is objected to because of the following informalities: there is an insufficient antecedent basis for the limitation "the terminals" in line 7, therefore "the terminals" should be -- terminals --. Appropriate correction is required.

Conclusion

11. This application is in condition for allowance except for the following formal matters: the objections to the drawings, specification, and claim set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

12. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-11 recite, inter alia, an electricity meter for monitoring electric power consumed from a service line, the electricity meter comprising a load management system selectively coupling and decoupling the peripheral device from the power converter, said load management system sensing the unregulated voltage to determine whether to couple or decouple the peripheral device.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Kennon et al.	5,488,565	Tamper Detection Method And Apparatus For Load Management Terminals.
Loy et al.	5,940,009	Apparatus And Method To Detect Tampering With An Electronic Utility Meter.
